REMARKS/ARGUMENTS:

After entry of this amendment, claims 37 – 39, 44 – 45, and 48 – 59 will be pending in the application. Claims 48 and 51 have been amended.

In the office action claims 48 and 51 were rejected under 35 USC 112, second paragraph as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In particular it was noted that it was unclear how the building of additional layers of element "g)" of claim 48 is part of the forming of the first layer. Furthermore it was noted that it was unclear how the building of additional layers of element "h)" of claim 51 is part of the forming of the first layer. Elements "g)" and "h)" respectfully were not intended to be part of forming the first layer. Each of these elements has been relabeled as elements (ii) in their respective claims to separate them from element (i). It is believed that these amendments in combination with the other amendments made herein, remove the indefiniteness that was present in the previously presented claims.

Based on the amendments made herein and the explanations given above it is believed that all issues raised by the Examiner have been addressed and that the application is in condition for allowance. It is further believed that the amendment made to the claims do not raise new issues or necessitate a further search. Entry of this amendment and passage of the application to allowance is earnestly solicited.

Respectfully submitted,
